ADDITIONAL SERVICES

ection 6.5.5

'rovider will provide in its response a cost for demarc extensions:	COST:	$85 (per Hour) + Materials
'rovider will provide in its response a flat rate for cutover support, which includes on-ite physical exchange of connections and router reconfiguration	FLAT RATE:	$0.00

TRAINING

ection 6.8 - Training

f there is a cost associated for providing the training described in the Training Plan include a description of the training and the cost. Designate the unit/increment cost such as per group or per individual.

Description of Training	Unit Cost	Total Cost
telecom will not charge the State of Idaho for any training described in our RFP Response	$0.00	$0.00

'his proposal is quoted based on rates and construction to all sites as proposed. Eliminating or adding sites may change tw telecom capital requirements and may affect quoted rates. In the event Customer wants individual circuit rates, tw telecom will assess the investment required and will quote services on a case-by-case basis. tw telecom will build and construct fiber to any State of Idaho facility if he capital and monthly recurring revenue meet the tw telecom capital investment financial model. The financial model is based on actual costs, services contracted and term of contract. At some locations requiring multiple circuits, tw telecom has aggregated services onto one single circuit to offer the State savings. Those locations are noted as Aggregated in the bandwidth offered column of the Cost 'roposal. There is no charge for VLAN tags to segregate traffic at those Aggregate sites. Upon contract award or State's request, tw telecom can offer aggregated or multiple ports at any location.

'lease note that tw telecom has quoted the State's requested Aggregation Point of 700 Stratford twice, once in the main costing sheet and again in the Aggregation Points Section of the Costing sheet. Please note this duplication during cost evaluation and apply a single monthly recurring cost for aggregation. State of Idaho does not have to purchase both aggregate circuits in order for tw telecom to onor the rates listed. The aggregation circuit at 450 State is offered as an optional service, as is the DS-3 quoted at that site. tw telecom did not list termination costs as we will adhere to the State of Idaho Standard Telecom Ts & Cs where Early Termination Charges are concerned. Dark fiber quoted is contingent upon the State of Idaho procuring all the services as proposed.
