

STATE USE LAW

- Purchasing Agents:
- State Department Administrators
- County Commissioners
- Mayors and City Managers
- City Clerks:
- Political Subdivisions:

DID YOU KNOW THAT...?

- ⇒ State law permits the purchase of commodities and services in any amount and without bids by every state agency and department and city, county and political subdivision with the State of Idaho?
- ⇒ Many diverse commodities and services are available to you for purchase at fair market value without advertising for bid?
- ⇒ More than five hundred (500) workers in this state are ready, willing and able to deliver to you such preferentially procured goods and services now?

IF YOU DON'T KNOW,

PLEASE READ ON

BACKGROUND

Idaho is one of some thirty states with laws that give priority to the purchase of goods and services from people with disabilities. Idaho's State Use Law", Section 67-2319 of the Idaho code was passed in 1973 and provides as follows:

Products which are manufactured by and services as provided by non-profit corporations and public agencies operating rehabilitation facilities serving the handicapped and disadvantaged and offered for sale at fair market price as determined by the Administrator of the Division of Purchasing which meet the specific requirements for such products may be procured by the state agencies or departments or any political subdivision of the state for such non-profit corporation or public agencies **"without advertising for bid."**

Section 1, of the 1973 Session Laws, Chapter 291 also states:

"It is the intent of the legislature to encourage state agencies and departments and other political subdivisions of the state to purchase products manufactured by and services provided by non-profit corporations and public agencies operating rehabilitation facilities serving the handicapped and disadvantaged."

On February 1, 2005 Governor Dirk Kempthorne, through Executive Order No. 2005-03 continued the Idaho Council for Purchases from Severely Disabled People to promote the purchase of goods produced by severely disabled people in rehabilitation facilities.

Community Rehabilitation programs provide transitional employment for persons with disabilities. By matching up the government procurement requirements and the capabilities of Idaho's community rehabilitation programs to produce selected commodities and services, you will increase meaningful employment opportunities.

Idaho's non-profit community rehabilitation programs represent a work force in excess of 500 persons with disabilities throughout the State of Idaho.

Personnel are closely supervised with major emphasis on training, quality and dependability.

Labor-intensive operations are what we do best.

Like most businesses we prefer long-term contracts, but we can also assimilate peak demand orders.

In the next two sections you will see a partial list of manufactured goods and services that are available from our various organizations throughout the state.

While these products and services are currently being delivered, we are always looking for opportunities to expand.

We welcome your ideas on new items and services with which to expand our market capabilities.

ACCSES-Idaho coordinates purchases under Section 67-2319 (HB-231). ACCSESS-Idaho is authorized to market goods and services and to distribute orders to certified non-profit producers on behalf of:
